

Ref No. : CIL/S&M/4660 MW/ 91

Date : 08.03.2016

Sub: Notice Regarding inclusion of additional sources for supply of coal through 'best effort' MOU to 4660 MW capacity and similarly placed capacity of 9940 MW having no LOA

The following modifications for supply of coal through 'best effort' MOU to 4660 MW capacity and similarly placed capacity of 9940 MW having no LOA has been agreed for the remaining period of this financial year and also for the next financial year:

- i) In case of SECL, 75% of total supply might be of lower grades of coal (G6 and below) provided at least 25% of total supply is of higher grades (G5 and below) from Korea-Rewa by all modes i.e. on lifting of 100 tonnes of higher grades, entitlement for lower grades will be for 300 tonnes.
- ii) Supply to 9940 MW similarly placed TPPs: - In addition to the existing sources they might also be allowed to lift from the proposed modified sources of 4660 MW as mentioned above.

Existing source of supply for 4660 MW & 9940MW capacity category of power plants from other coal companies remains unchanged.
